Table 1

ReadyTalk	
Pros	Cons
Higher pay than PivotDesk - \$18 > \$15	Hard to find a place in Denver for just the summer
More established company. Feels like the job was harder to get/ more prestigious.	Moving is annoying
Chance to get out of Boulder for the summer - Live in Denver	Java Development (Not bad and still in extremely high demand, but I really enjoy Ruby on Rails development)
Outside Magazine rated in top places to work	Only for the summer
Great perks • Office bikes for running downtown errands	
Yoga offered twice a week	
On-site gym and locker room	
Wellness programs, including massage, acupuncture and chiropractor, offered in the office	
Kitchens stocked with snacks, fruits and vegetables	
Work with other interns on separate project	Work with other interns on separate project
Fun workspace - nerd guns, comradery feeling, xbox, wii, friday drinks with coworkers, kegerator in the kitchen.	Even if I do move, commute to work or borrow girlfriend's car is difficult. + \$200/mo parking permit
PivotDesk	
Pros	Cons
4 blocks from my house - easy commute, 5 min walk	Lower pay. Was \$12/hr, fortunately negotiated \$15/hr
Ruby on Rails development - Want to do Rails Dev after graduating	Lacking Perks
Only ~20 employees - chance to make an impact even as Intern	Not as "fun" workspace. Most devs just wearing headphones while coding
Internship doesn't have to end at the end of summer, could extend through school year. Abile to earn more experience doing what I want to do when I graduate.	Doesn't feel very official and/or stable.
Don't have to move (find apartment, put our apt on craigslist, rent Uhaul, etc) for 3 months. Girlfriend's job is in boulder as well and will live here next year as well.	
Rails developers are in really high demand in California (would love to live there) and very competitive pay
